

Free the spirit

The power of the wind brings unlimited potential to help ensure a more sustainable future for us all.

International targets to substantively increase energy supplies from wind are a huge opportunity for those businesses with the right expertise, technology and supply chains in place.

But capturing that boundless energy comes with significant challenges.

And that's where DHL can help.

We touch people's lives more than you can imagine.

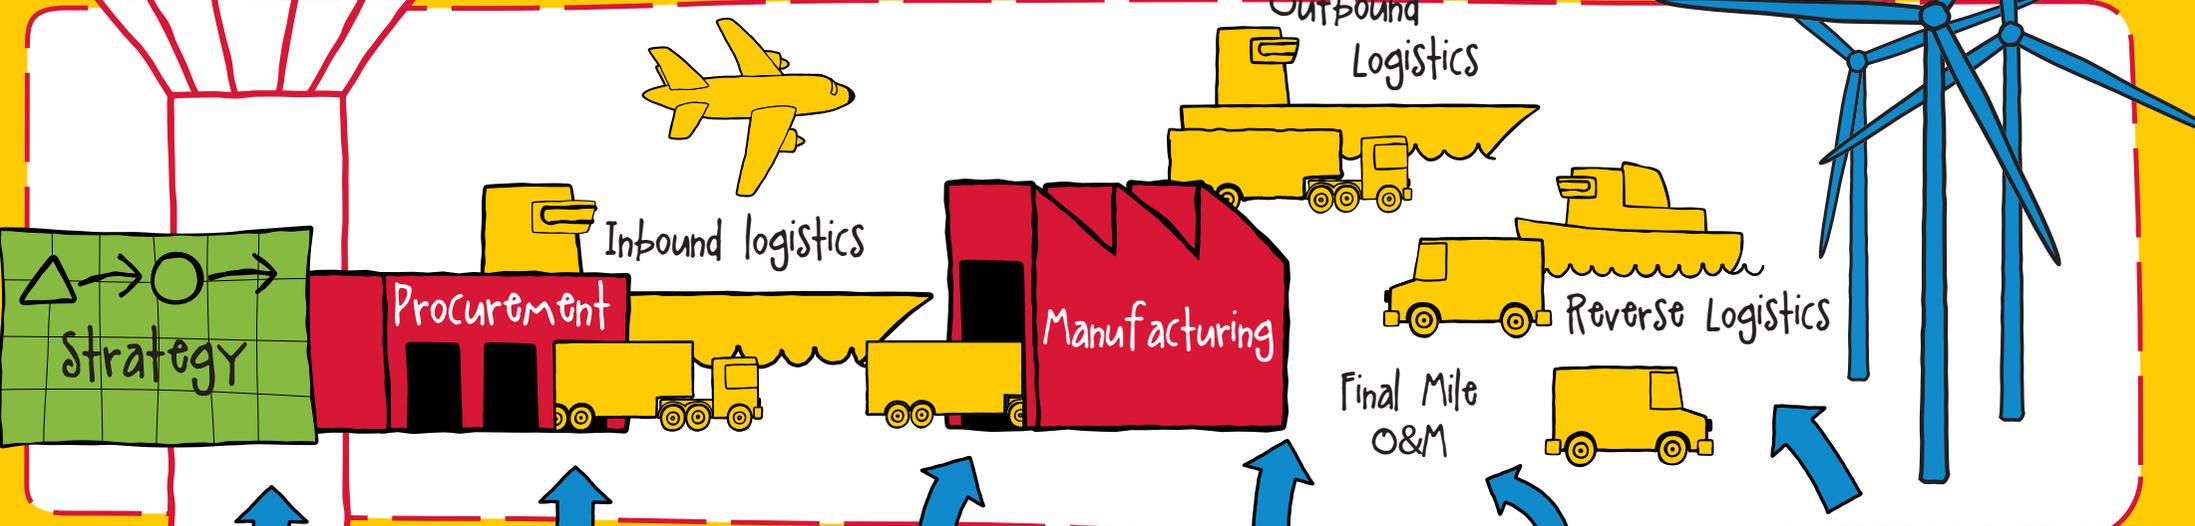

So let us work with you to capture tomorrow's energy.

Moving with tomorrow's energy

EXCELLENCE. SIMPLY DELIVERED. **DHL**

Control Tower

STRATEGY & PROCUREMENT

Our renewable energy team will increase your speed to market by designing an optimal supply chain and managing your procurement to drive down costs. We'll even advise you on wider operational issues through our supply chain consultants.

INBOUND LOGISTICS

Tapping into our global transportation network will ensure you have what you need, where you need it. With the ability to track and trace throughout the supply chain journey.

MANUFACTURING

Our inbound-to-manufacturing best practice service will manage components in-plant, provide an up to date inventory, assemble engineer kits and sequence delivery of parts to the right fitment or assembly point.

OUTBOUND LOGISTICS

Our global network will optimise transportation, reducing carbon emissions and ensuring safe and reliable handling of your valuable cargo.

FINAL MILE O & M

Flexible & sustainable shared user solutions to consolidate collections & deliveries, better control inventory levels and optimise on-site repairs.

REVERSE LOGISTICS

Simply put DHL will design the most suitable return supply chain to meet your needs, collecting wind turbine parts such as bearings and generators or any other components for refurbishment.

Right place, right time

As the wind energy market grows, having the right services and infrastructure in place plays a fundamental part of being able to succeed.

Wind energy is no longer a niche activity so driving down costs to improve profitability and economy of scale is a priority.

A global enterprise means more complex global logistics, construction and maintenance requirements, both on and off shore and in all manner of challenging locations.

The market is sure to consolidate, so having the leanest, most agile supply chain could make the difference to your position of strength.

And throughout this fast changing industry, you want only safe and sustainable supply chain solutions which means acting smartly, turning to and leveraging the right expertise.

Partnering with the global leader in logistics will increase your speed to market and support your business growth.

DHL - a safe pair of hands - always with you, always there.
